

Unicla Compressor Identification

1. Model

UC = Alternator Mount
 UP = Ear Mount
 UPF = Ear Mount - R404a Ester Oil
 UPH = Hydraulic Drive
 US = Direct Mount (Sanden Style)
 UV = Direct Mount (Valeo Style)
 UM = Valeo / Tama / Que replacement
 UMF = Valeo / Tama / Que replacement R404a Ester Oil
 UN = Denso 10P30B Replacement
 UNX = Denso 10P30C Replacement
 UX = Unique Unicla mounting
 UXF = Unique Unicla mounting R404a Ester Oil
 UWX = 14 cylinder 440 / 550 / 660

2. Series

Capacity

45	45cc
90	90cc
120	120cc
150	150cc
170	170cc
200	200cc
330	330cc
380	380cc
440	508cc
550	607cc
660	675cc

3. Serial Number

This is the key. Quote this to our sales team for identification.

Note: if Serial Number is missing or illegible, please see the section below for dimensions required by our team to provide identification.

4. Original Refrigerant & Oil Type

Denotes the refrigerant and oil type the compressor was originally built to run on. Use of other refrigerants or oils could result in reduced operating life span and/or void warranty.

Critical Measurements

When serial number is not available, the measurements shown below are the minimum required to enable identification. These, along with digital photographs of the compressor, will be requested by our customer service team. Voltage for clutch is also required.

Clutch diameter and number of grooves
 A, B section or Polygroove

Gauge line (Pulley Alignment)

Front of front mounting lug to centre of front groove
